

2X Remote Application Server Office Without Limits

2X Remote Application Server delivers virtual desktops and applications from a central location, providing continuous availability, resource-based load balancing and complete end-to-end network transparency for administrators.

10 Key Benefits of 2X RAS

1. Enable users to connect to desktops and apps from anywhere
2. Print and scan without limits from any device
3. Impress with unparalleled remote video performance
4. Secure and control your data at server and user level
5. Reduce desktop admin with easily manageable clients
6. Enhance features by leveraging Windows server and user technologies
7. Improve support productivity using powerful shadowing
8. Optimize your computing resources with smart load balancing
9. Let your IT follow your business with its flexible scalability
10. Enhance productivity from the start with all-in-one product software

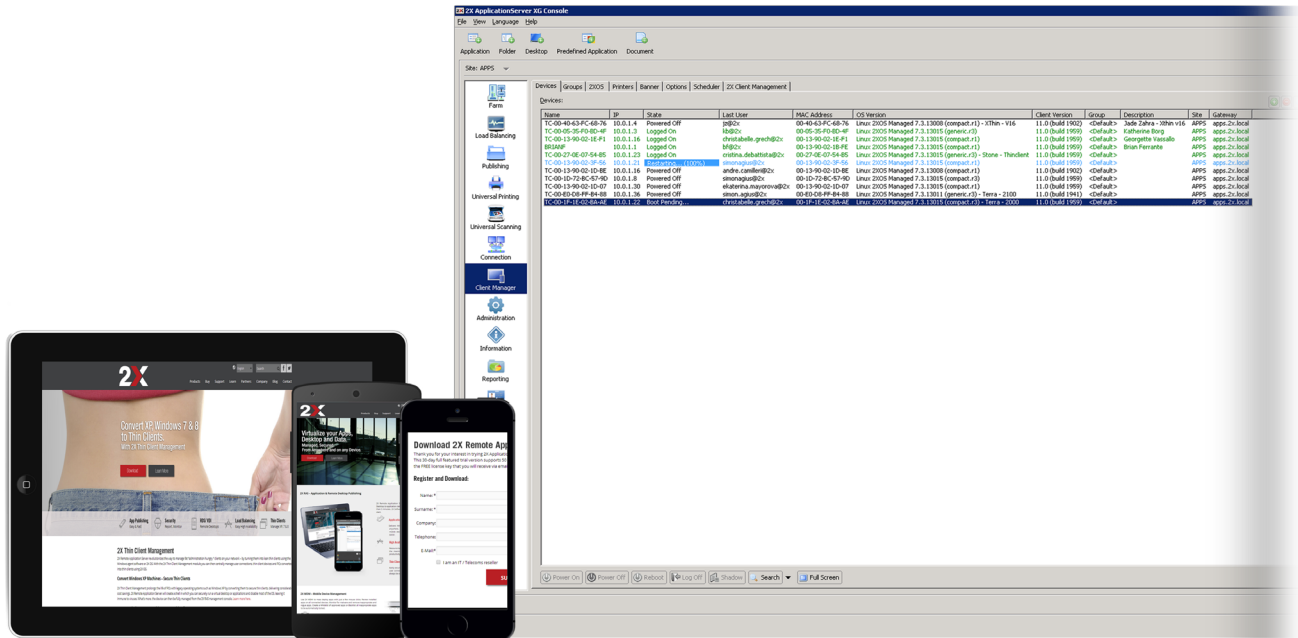

Easily deliver Windows applications hosted on hypervisors and Windows remote desktop servers to anyone anywhere using any type of operating system, computer or mobile device.

Easy to configure and install; it can be set up in less than 5 minutes.

2X Software's solutions offer an outstanding experience from the start.

2X RAS transforms any HTML5 browser into a business workstation. As a matter of fact, you can continue to use your business applications, primarily MS Office. How it works is quite simple. 2X Software grants access to a pool of business applications on any device and wherever you are; the end user just has to click on an icon to work on Chromebook as on a normal PC.

Application Publishing

Deliver applications to remote users and mobile devices in a seamless and easy-to-manage way. The user can continue to use the same files as though working on his office workstation. 2X Software is easy to configure; with the drag and drop functionality, publishing an application is a pleasant experience.

Security

The 2X management and reporting tools provide a synoptic view of your infrastructure. 2X RAS delivers real-time monitoring and alerts allowing you to create and manage security policies. You can create intuitive compliance and usage reports from the management console.

Remote Desktop – VDI

Mix the most popular hypervisors with 2X RAS to deliver seamless application virtualization and publish remote desktops. 2X Software manages Virtualized Desktop Infrastructure (VDI) or Microsoft Remote Desktop Services (RDS) independently and easily.

High Availability – Load Balancing

Load balancing delivers high performance across your organization, allowing your farm to work at high availability. 2X RAS easily configures the infrastructure to your load needs by optimizing your resources.

Thin Client Management

Reduce the cost of your hardware using a thin client infrastructure. Convert your outdated PCs into secure and reliable thin clients using all the power of 2X OS Software. 2X Thin Client Management centrally manages all the user connections to facilitate configuration and maintenance.

Universal Printing and Scanning

Allow your users to print and scan from any device: their desktop, thin client, iPad, iPhone, Android or Windows Phone. 2X Universal Printing and Scanning is autoconfigured, without any extra action required by the IT Administrator. Users can print and scan on all available printers and scanners, without having to install a driver.

Thousands of companies worldwide rely on 2X
