# Advanced Email Security for Microsoft 365
A feature available with SolarWinds Mail Assure

The SolarWinds® Mail Assure cloud-based email security solution helps you protect Microsoft 365® users from cyberthreats that infiltrate through email. Mail Assure seamlessly integrates with Microsoft 365 via an Microsoft 365 add-in—and the SSO/sync functionality is designed for effortless onboarding of multiple Microsoft 365 users.

SIMPLIFY ONBOARDING OF MICROSOFT 365 CUSTOMERS FROM A MULTITENANT DASHBOARD

» Add multiple Microsoft 365 users with an onboarding wizard, available from the Mail Assure interface, by safely connecting with Microsoft 365 credentials.

» Improve efficiency with automatic synchronization of new Microsoft 365 mailboxes, distribution lists, and shared mailboxes.

» Keep usage under control with scheduled automatic synchronization of added and deleted mailboxes.

» Manage customers through a multitenant dashboard with predefined settings, reporting, and views built for MSPs, customers, technicians, and email users.

INCREASE EMAIL PROTECTION FOR MICROSOFT 365 USERS

» Safeguard Microsoft 365 inboxes with proprietary email filtering technology—with near 100% accuracy.

» Help prevent email and display name spoofing with support for SPF, DKIM, and DMARC.

» Reveal users and accounts sending out spam from networks with automated abuse management.

» Help prevent zero-day attacks with attachment and macro blocking management.
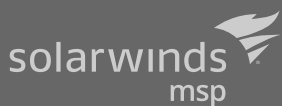

OFFER GREATER CONTROL AND TRANSPARENCY OVER EMAIL FLOW

» Give users added control to report "spam" and "not spam" messages from Outlook®, on the web, macOS®, Windows PC, iOS®, iPadOS®, or Android®, with the Microsoft 365 add-in available from Microsoft AppSource—at no additional cost.

» Leverage single sign-on (SSO) for Microsoft 365 and Azure® Active Directory® to the Mail Assure dashboard.

» Provide power over email flow with email user access to the spam quarantine, including options to release, remove, blacklist, or whitelist messages.

» Offer insights over email flow with email scout (quarantine) reports.

MAINTAIN BUSINESS PRODUCTIVITY

» Keep email up and running with 24/7 built-in email continuity that allows users to continue to receive, compose, and send email in the case of Microsoft 365 outages or downtime.

» Help prevent customers from losing messages or access to important email with long-term email archiving.

» Retain and recover Microsoft 365 emails with unlimited retention-period capabilities for email archiving.

» Help users easily pull emails from existing Microsoft environments with support for journaling.

KEEP MICROSOFT 365 CUSTOMERS SAFE AND BOOST YOUR BOTTOM LINE

» Make it easier for Microsoft 365 customers to add additional layers of protection.

» Stand out from competition by offering powerful email security that provides seamless integration with Microsoft 365.
