

# ALTARO EndPoint Backup for MSPs

This subscription program enables you to back up your customers' files stored on their Windows-based endpoints, such as desktops and laptops, be they located on premise or offsite. Manage and monitor backups across all your customers through a multi-tenant console.

## Multi-tenancy

Manage and monitor all your customers' desktop and laptop backups centrally through Altaro's multi-tenant Cloud Management Console.

## Pay per endpoint per month

Simply pay per endpoint backed up per month; this includes award-winning 24/7 support.

## No binding contracts

Minimum monthly starter pack of up to 10 endpoints across all your customers, with no contracts; scale up to 1,000s of endpoints.

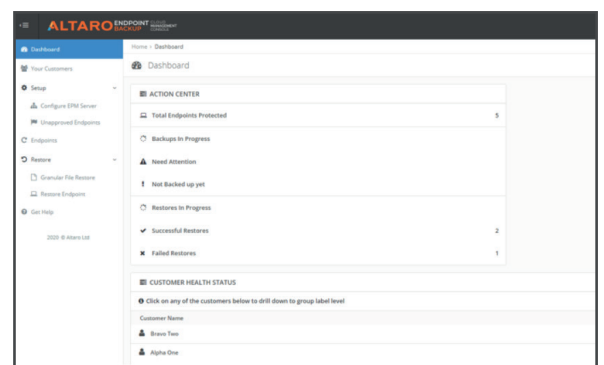

## Provide storage services from the cloud

Save endpoint backups to your own MS Azure account and scale without restrictions. You can also bill for storage used.

Altaro EndPoint Backup for MSPs is a robust backup - solution that enables you to provide data backup and recovery services for on-premise and roaming desktop PCs and laptops. You can also provide storage services from your own Azure account. For added control and convenience, centrally configure, manage and monitor all your customers' backups through a multi-tenant online console. Award-winning 24/7 support is included.

## Benefits of the Altaro EndPoint Backup for MSPs subscription program

- **Multi-tenancy** - Manage and monitor all customer endpoint backups through a single pane of glass, through a multi-tenant console.
- **Pay as you go** - Pay per endpoint. No binding contracts: minimum starter pack of up to 10 endpoints per month across all your customers. Scale to thousands of endpoints.
- **Data storage** - It's quick and cost-effective to set up your own MS Azure storage account to save customer backups to. Bill each customer for storage used.
- **Free for your own internal use** - Back up 10 of your own endpoints per month for free.

EndPoint for MSPs monthly subscription program includes 24/7 priority support and the use of:

## MULTI-TENANT CLOUD MANAGEMENT CONSOLE

Set, monitor and initiate backups, restore, track billing and more across all your customers.

Altaro's ground-breaking Cloud Management Console (CMC) is a cloud-based management platform that enables you to centrally manage and monitor all your customers' endpoint backups from a single online console.

### Multi-tenant

Designed to manage multi-customer environments from a single pane of glass.

### Real-time status updates & alerts

View live operation activity and backup results as they occur. Set instant email alerts for successful and failed operations, warnings, and more.

### Manage your backups/restores

Start backups, configure backup locations and restore machines directly from the online portal.

### Customer reporting

Report on backup usage by customer for easy invoicing.
