

CLUEBIZ

AUTOMATED SOLUTIONS

MORE PERFORMANCE FOR MSP'S WITH DELIVERIES

Your perfect IT Workspace Management Solution. Anytime, anywhere, simply superior

Maximum quality and flexibility

Whether PC, server or mobile devices: Deliveries sets new standards in the efficient IT administration of your customers. Already during handling, because Deliveries is made available to you as a web application from the Cluebiz data center. As a result, you do not have any internal infrastructure requirements and the system is ready for immediate use.

Use your savings potential

Deliveries can also bring huge savings to your business: it's fully functional, even with minimal bandwidth, and software deployment even works via Wi-Fi hotspot. When you set up multiple PCs, the required data is reused by one of the already managed target devices: You do not need to have any replication servers available at remote sites - installations of even large amounts of data via the Internet are easily possible without expensive leased lines.

DELIVERIES HIGHLIGHTS

- Individual software deployment
- Simple base setup of Windows PC's
- Optimize your workflows as an MSP and reduce your costs within days
- actual inventory data of soft- and hardware
- Multi tenant and scalable
- Well arranged web console
