

Perfect Cloud Storage Service

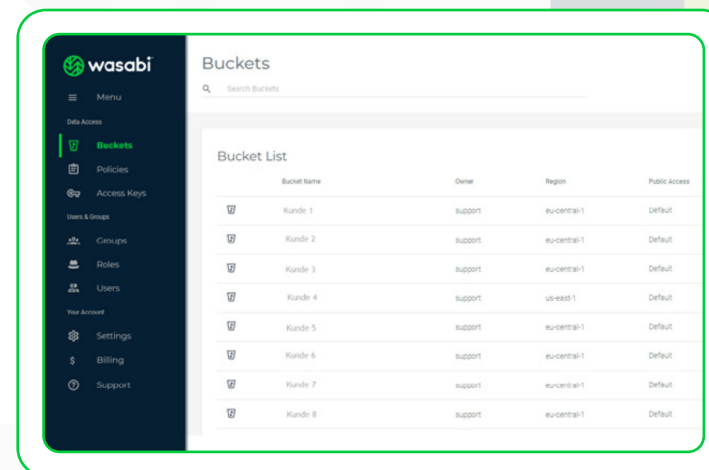

- **Unlimited** storage in **EU data centers** at an unbeatable price
- Ideal for **Offsite-Copies for ALTARO, XOPERO** and other backup solutions
- **Ransomware resistant** - resistant to intentional changes or deletion, ensuring **100% data integrity**
- **100% performance at 25% of the cost** of comparable providers*

We decided to partner up with **Wasabi** in order to extend our offering with highly requested **public cloud object storage services**. Wasabi offers a public cloud object storage service at a fifth of the price of an Amazon S3 and is also significantly faster and more powerful than any competitor. With the recent addition of Immutability Wasabi positioned them selves as key vendor for Backup & DR service providers.

Big advantage of Wasabi is their price, **all features and services are already included** - so there are **no hidden or uncertain, unpredictable costs** as with other vendors (Azure, S3 and similar) - **no egress fees** (download / query of storage data), **no additional costs for API requests or computing time**. Wasabi is fully compatible with the Amazon S3 API and can therefore be used in all solutions that have an S3 interface. Besides that Wasabi is certified to meet all EU Privacy Standards and Enterprise requirements.

For partners who feel that Wasabi RCS starter package exceeds their needs **we offer more flexible model with 1TB packages**. Billing takes place monthly according to usage and the commitment period is only 3 months. This special package is ideal for partners with smaller customers or low potential for a sustainable, permanent expansion of RCS storage needs.

NEW: NESTEC HOT CLOUD STORAGE BY WASABI - NOW WITH YOUR OWN WASABI DASHBOARD FOR COMPREHENSIVE BUCKET MANAGEMENT!
