

SolarWinds Backup

Back Up Business Documents Automatically

Your organisation runs on data, and many organisations protect their data by backing up servers and a few key workstations.

However, large amounts of data reside in spreadsheets, documents, or presentations stored on workstations. Loss of that data from natural disaster, hardware failure, ransomware, or accidental deletion could be catastrophic.

IT service providers and business owners have long recognised the importance of protecting the intellectual capital stored in business documents but have struggled with the cost of provisioning and administering a broad full workstation backup programme.

SolarWinds® Backup Documents locates and backs up unlimited documents from every workstation twice a day—automatically—for €1 a workstation/month, and with our global cloud network, users can self-service restore documents anywhere at any time.

KEY FEATURES

- » Two automated documents backups per day
- » 56 versions to restore from per 28-day period
- » Only EUR € 1 per endpoint

GO BEYOND DOCUMENTS

For complete workstation and server backup, you can upgrade to the full version of SolarWinds Backup.

SUPPORTED DOCUMENTS

Documents

- .DOC—Microsoft® Word Document
- .DOCX—Microsoft Word Open XML Document
- .ODT—OpenDocument Text Document
- .PAGES—Pages Document
- .PDF—Adobe® Portable Document Format
- .RTF—Rich Text Format File
