accessing the unlimited

For Companies

Work from anywhere, safely and with lean structures and costs

Easy access to applications and data, rapid provision, freedom to choose the device, and the ability to work anywhere and at any time increase your competitiveness and your attractiveness as an employer.

With the **digital workspaces** from oneclick™ you can deliver any application, from any infrastructure, on the right device, for the right person, at the right time and location. Since the cloud platform includes **all the components for application provisioning**, all you need is a browser and you are ready to go.

"After a comprehensive information security audit, we use the oneclick™ platform for the secure and uncomplicated provision of various applications and data for our external service providers."

"The streaming of applications and the associated elimination of tedious VPN handling for connecting external sites and mobile users has led to a significantly higher level of user satisfaction."

"With oneclick™, our consultants can use a wide range of applications via the browser under MacOS and Windows. It feels as if the software has been installed directly on their own computers."

The oneclick™ platform includes the following features:

Fully **personalised, secure web portal** for access to all assigned apps across all operating systems = **Native Windows, Linux, MacOS & Web.**

Extremely fast, self-developed streaming protocol for **smooth remote work** as well as optimised mouse and keyboard inputs for mobile devices.

With oneclick™ as your delivery model for applications and data, you can reduce **provisioning costs by up to 50%.**

Test our **free trial:**
